WORK EXPERIENCE

Front-End Developer **Jul 2023 - Present**
ProbePlus Innovative Solutions

A front-end web application developer utilizing React.js and modern web technologies to create reusable and scalable components. Primarily engaged in the development of a healthcare embedded system integrated web app featuring live monitoring and real-time data. Proficient in creating visually appealing static websites by incorporating modern animation trends and technologies through agile work in accordance with client requirements.

- Developed more than 3 web application demos for (POC) purposes within a short time frame.
- Customer satisfaction is ensured through agile and continuous integration methods
- Secured new projects from the same client through high performance in the existing project.

Junior campaign assistant **2019 - 2020**
Wipro Limited

A Front-end Developer with a focus on crafting email campaigns using responsive design strategies and creating reusable, clean components for visually appealing templates. These templates have been successfully deployed in multiple languages.

- Created over 10 email templates daily during the Covid-19 pandemic.
- Achieved the maximum email deployment per day for one month through team work and coordination.
